**3. Scenario 3:
Transfer of equity**

William Prynne and Tracey Prynne have recently got divorced. They jointly own a property registered at HM Land Registry under title numbers ST500681. There is a mortgage (Abbey National PLC) registered on the property with a restriction preventing any disposition of the registered estate without their consent. There is also a joint proprietorship restriction on the register. As part of the divorce settlement William has agreed to relinquish his equity share in the property, the value of which is deemed £35,000. Tracey has agreed with Abbey National PLC to take sole responsibility to pay the mortgage. The conveyancer acting for Tracey submits the application to HM Land Registry. William is represented by a different conveyancer.

Documents required by HM Land Registry:

AP1

Transfer

RX3

Statement of Truth

HM Land Registry require representation details for the Transferors and the Transferee

NB The Transfer is not for value, SDLT evidence is not required as consideration is under the £40,000 threshold. The Bank consent to release William from the mortgage terms & conditions in panel 11 of the TR1. Statement of Truth is provided by Tracey to support the RX3 to remove the joint proprietor restriction.

3.1 Main flow to request official copy with a register extract using the title number – not necessary for usual every day use but just for showing the register in the ‘before’ state.

3.3 Attachment service

For this scenario the attachment can be called three times. Once for the transfer, another for the RX3 and the final Statement of Truth. The attachment Id should change to match the corresponding application/document.

Attachment request using a supported file

```

Once the application has been processed a poll request for the completed application can be made. For the test stubs this has already been processed and so the poll can be completed at anytime.

For the live service it will be expected that the outstanding request service will be used to confirm if a response has been generated, and is ready for collection.

3.4 Electronic document registration poll service

Request the AP1:

```
