1. Outstanding requests

1.1 Main flow of outstanding requests

Test: Official search with priority 01			
Test purpose: Main flow of official search with priority			
Field group	Field name	Input	Expected output
Login Details	User ID	BGUser001	Details of requests for polling as below
	Password	landreg001	
	User locale	en	For the 'ShowOnlyNewResponses' indicator the results will vary depending on the settings below, true will only show those applications with a value of 'new', false will return all for that service.
	Message ID	<i>Any value</i>	
	AdditionalProviderFilter	<i>Any value</i>	
	ShowOnlyNewResponses	<i>true or false</i>	
Remaining fields can be set to any value and will restrict output as relevant			

Output data will be based on the following:

Service	Message Id	Status
70	pollstilloutofhours	false
70	pollsuccessnoresults	new
70	polltitlenumberclosed	new
71	pollstilloutofhours	false
71	pollsuccessnoresults	new

1.2 No outstanding requests

Test: Official search with priority 02			
Test purpose: Manual flow of official search with priority			
Field group	Field name	Input	Expected output
Login Details	User ID	BGUser001	Result Date/time present, but no results will be presented.
	Password	landreg001	
	User locale	en	
	Message ID	testnoresults	
	AdditionalProviderFilter	<i>Any value</i>	
Remaining values are irrelevant, but if filled in Specific Service must be valid			

1.3 Invalid service

Test: Official search with priority 02			
Test purpose: Manual flow of official search with priority			
Field group	Field name	Input	Expected output
Login Details	User ID	BGUser001	Rejection: bg.invalid.service.type
	Password	landreg001	
	User locale	en	
	Message ID	testnoresults	
	AdditionalProviderFilter	<i>Any value</i>	
Any invalid specific service (e.g. 1000)
