

The new migration service Delivery Partners

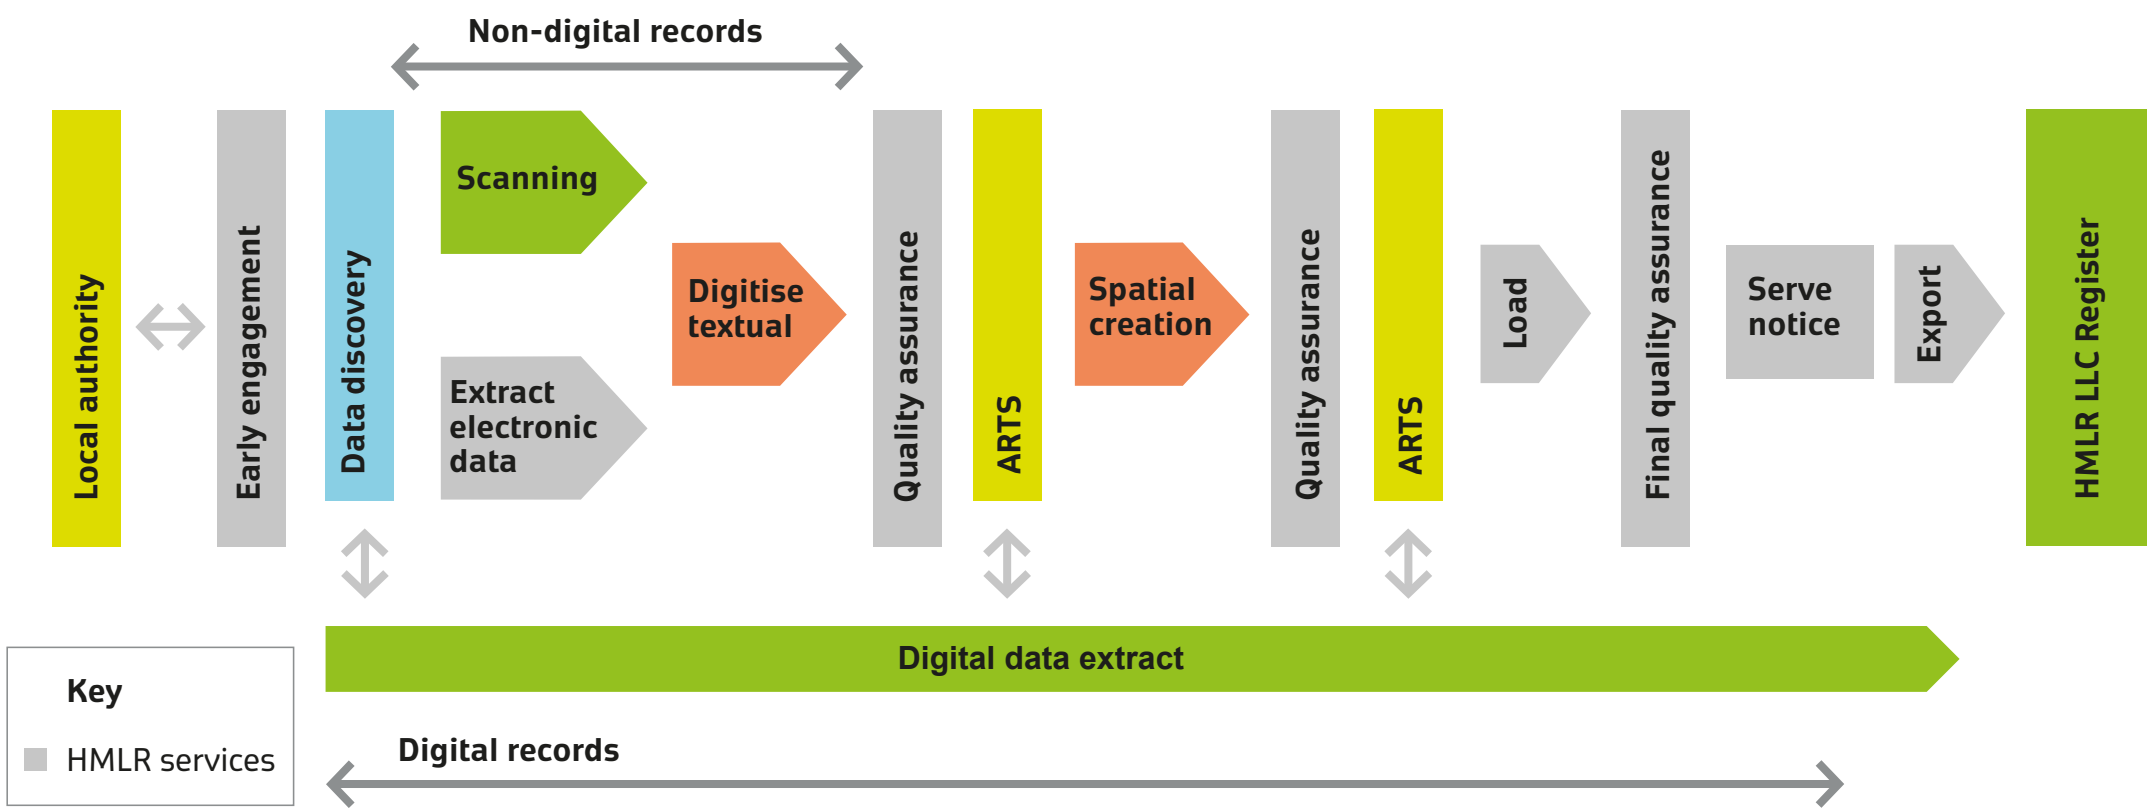

It is HM Land Registry's ambition to migrate all local authorities local land charges (LLC) data to the central, digital register by 2025. To support industrialised delivery, HM Land Registry has contracted two data transformation delivery partners:

1. Cyient Europe Ltd
2. Landmark Information Group Ltd

Delivery Partners' services:

- Discovery** – determine the data required for a digital dataset and develop a migration delivery plan
- Scanning** – scan paper and/or microfiche records for register creation
- Digitisation** – create textual digital records from non-digital data sources
- Spatial creation & improvement** – create spatial digital records and cleanse existing spatial data to HM Land Registry's standards
- Analysis Rules & Transformation (ARTS)** – analyse and develop business rules that transform the data to HM Land Registry's standards

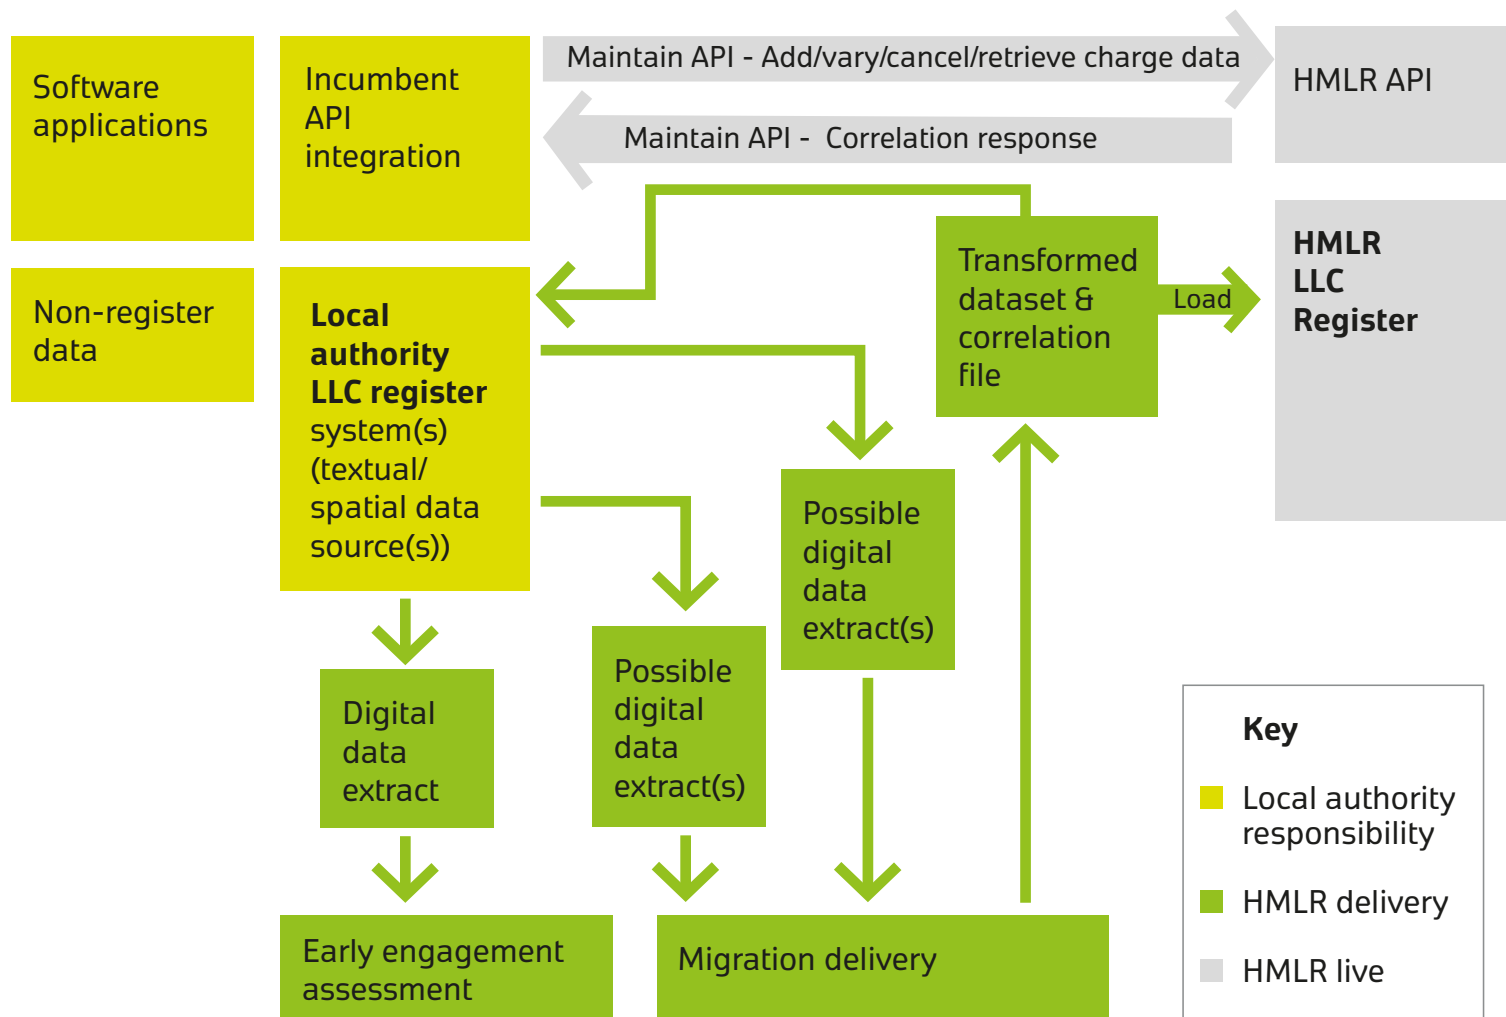

Migration delivery: Delivery Partners' services in colour

The incumbent Delivery Partners

The incumbent Delivery Partners are the existing local authorities' software suppliers. They work with HM Land Registry in data transformation, migration delivery and the maintenance of the central LLC Register.

Service operations

The incumbent Delivery Partners services:

Data extracts

Build and deploy a data extract toolset to extract LLC data from the local authority's register and supporting systems

Import

Load the transformed data into the local authority's systems after the migration delivery

Application Programming Interface integration

Develop and deploy the Application Programming Interface (API). The API enables automated updates from the local authority systems to HM Land Registry's LLC Register after migration is complete
