

# Positional Accuracy Issues (PAI)

## Before

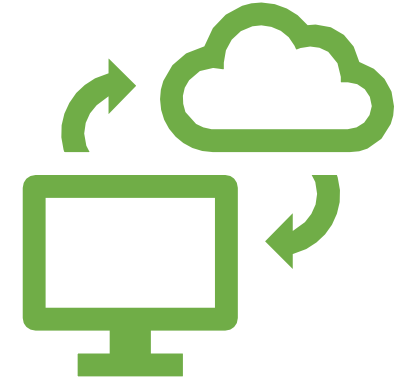

- Identify digital spatial layers affected by PAI
- Provide extract of the layers to HMLR
- HMLR provide access to and support with the Migration Helper tool

## During

- HMLR applies automated fixes where agreed with local authority
- Local authority uses the Migration Helper to fix remaining PAI extents

## After

- Re-import fixed digital dataset
- Local authority now uses fixed digital data for business as usual
